

# Victorian Alps & Grampians

This tour will see you enjoying some of Victoria's best mountain tracks, starting in the Grampians, famous for its sandstone mountains and home to some of south east Australia's most notable rock art sites. You will encounter Mount Buffalo, one of Australia's oldest mountain parks, with 360° views from its most prominent peak - the Horn.

Traversing through the Alpine National Park, we take in highlights around Falls Creek, Omeo and the Bogong High Plains. With views in all directions and the delights of the snow gum forests, this cooler weather environment brings out the best in its own surroundings.
